REMARKS

Reconsideration of the above-identified patent application, as amended, is respectfully requested.

Claim 1 has been rejected in view of the prior art and has been amended to include all of the indicated allowable subject matter of claim 2 and is therefore believed that claim 1 is allowable. Claim 2 has therefore been cancelled. Claims 4-7, 10, 12 and 13 have been rejected in view of the prior art but now depend upon the amended claim 1 which includes the indicated allowable subject matter of claim 2. Thus, it is believed claims 4-7, 10, 12 and 13 should be allowed. Claims 3, 8, 9 and 11 have been indicated as containing allowable subject matter that if combined with the independent and intervening claims would define over the art of record. Thus, claims 3, 8, and 9 have been amended to include the base claim 1 and any intervening claims and are therefore believed allowable. Claim 11 defines the projecting ridge has been cancelled.

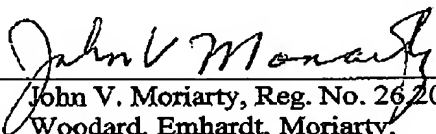

The drawings have been objected to because the element numbers for each part either differ from those found in the specification or are not found in the specification. Applicant has therefore amended the specification and drawing to be in agreement. More specifically, the annotated sheet with the drawings have been amended by changing item number 42 to item number 49 in Fig. 1 as marked in red in the enclosed copy of the previously submitted amended sheet in the International Examination. Enclosed is a new replacement sheet reflecting the change. It is requested the enclosed amended "replacement sheet" be substituted for the originally filed sheet depicting Figs. 1 and 2. Please amend Fig. 1 by replacing item number 42 with item number 49, all as shown in the enclosed red marked-up version of Fig. 1.

In addition to the amendment to Fig. 1, applicant has amended the specification to correct inconsistencies between the item numbers in the specification and the drawings. Submitted is a copy of the amended specification with markings showing all the changes relative to the immediate prior version of the specification of record. Any added subject matter is shown by underlining and any deleted matter is shown by strike-through.

Applicant has herein revised the drawings and specification to be consistent and amended the claims to provide for allowance. It is therefore believed the application is in condition for allowance and such action by the Examiner is respectfully requested.

Respectfully submitted,

By
